## Rechargeable Heated Dive Gloves

Hands are particularly susceptible to the chill and often the first part of the body to suffer in low temperatures. When cold and numb they can cause discomfort and be incapable of the proper handling of equipment. Capable, warm hands are much more beneficial, especially if you need to act quickly to escape an emergency situation underwater. Well-suited for extremely cold environments and underwater use as establishing and maintaining warmth is quickly achieved when wearing these gloves. The heating elements cover the whole back of the hand and fingertips, keeping the entire hand warm.

### TECHNICAL SPECIFICATIONS

- Evenly distributed heating elements
- Built in battery housing (top of glove)
- Additional arm band mounting option
- Magnetic swipe motion on/off switch
- Index fingers house magnet module
- Waterproof connectors
- Depth rated to 100m (328')
- Average temperatures: 35°C
- Designed to achieve skin temps of greater than +12°C in water temps of 5°C for durations of greater > 30 mins
- Operational temp -10°C to +50°C
- Storage temp -20°C to +60°C
- Battery life: > 100 - 110 mins
- Lithium polymer battery
- Electronic switch with red LED indicator
- Recharging time: 3 hours
- Battery output: 7.4V 2200mAh
- Battery weight: 150g (0.3lbs) each
- LVD Directive (2014/35/EU)

### GLOVE FEATURES

- 4.0mm flexible superstretch neoprene
- Close comfort fit = optimal dexterity
- Liquid taped, stitched seams
- Silicone overprinted textured palms gives user an enhanced grip
- Battery pouch
- Built-in heating elements
- Internal seal ring to keep out the water/keep in warmth
- Internal thermal lining
- Magnetic operational technology
- Sizes: S, M, L, XL, XXL

## Rechargeable Heated Dive Gloves

**1** 4.0mm flexible superstretch neoprene designed as a close comfort fit which provides optimal dexterity.

**2** Liquid taped, stitched seams the tape increases strength and durability of the glove and stops any water ingress.

**3** Subtle Northern Diver branding. Printed black on black making the glove ideal for covert use.

**4** Battery pouch, lined with OK cloth to allow additional battery packs or other Velcro backed equipment to be mounted.

**5** Waterproof batteries and connectors. Battery change time is 3 hours, run time: 100 - 110 mins and output 7.4V 2200mAh.

**6** Micro-coil heating elements built into the back of the glove and fingers provide added warmth and improved dexterity.

**7** Torch holder allows user to work hands free.  
*Torch is sold separate.*

**8** Overprinted textured silicone print on the glove palms provides user with additional grip and enhanced protection.

**9** The built in internal dry seal ring located on the wrist keeps your hands drier for longer, keeping the user warm and comfortable.

**10** Magnetic operational technology allows you to simply swipe wrists left or right to switch heat elements on and off.
